## OUR COMPANY HISTORY

In 1989, the foundation for Alpha Engineering was laid, marking the inception of our journey into the realm of manufacturing excellence. As an ancillary of the MOTHERSON GROUP, one of the global pioneers and largest wiring harness manufacturers, we began our endeavor with a commitment to quality and reliability. Our enduring relationship with the MOTHERSON GROUP has been pivotal in shaping our trajectory. It has underscored our expertise, technical supremacy, and the reliability of our designs. Over the years, this partnership has instilled in us a deep-rooted understanding of industry dynamics and fostered a culture of innovation and excellence.

Over the course of six transformative years, we honed our craft, forged partnerships, and established a reputation for unmatched quality and reliability.

In 1995, recognizing the need to embrace our expanding vision and diversifying portfolio, we underwent a significant transformation. We rebranded ourselves as PLASTOMETAL ENGG. (I) PVT. LTD., a name that embodies our commitment to innovation, precision, and the fusion of materials in our manufacturing processes. This evolution represents more than just a change in name; it signifies a strategic shift towards embracing our identity as pioneers in the industry. Under the banner of Plastometal, we continuously push boundaries, redefine standards, and lead the way towards a future defined by excellence and ingenuity.
